Delete Pages after extracting Extract pages as separate files **Extract** Close

A screenshot of the Adobe Acrobat Pro DC interface showing the 'Extract' dialog box. The dialog box is open, and the 'Extract pages as separate files' option is selected. A green callout box with a blue border and white text is positioned over the dialog box, with three green arrows pointing to the 'Extract pages as separate files' checkbox, the 'Extract' button, and the 'Extract' button. The callout text reads: "Select the page or pages you wish to extract. Choose Extract pages as separate files. Click Extract." Below the dialog box, a grid of 10 document pages is visible, numbered 1 through 10. Page 1 is highlighted with a blue border, and page 2 is highlighted with a grey border. The pages contain various text and images, including a table of contents, a list of items, and a photograph of a person.
